Product launches, full-stack development & infrastructure | EE undergrad, NSUT

EDUCATION

Course	College / University	Year	CGPA / %
B. Tech (Electrical Engineering)	Netaji Subhas University of Technology	2027	7.7
CBSE (Class XII)	Navyug Senior Secondary School	2022	86%
CBSE (Class X)	DAV Public School	2020	95%

EXPERIENCE

Associate Product Manager | Bachatt (Fintech)

May 2026 – July 2026

- Led the launch of a new credit-card product line in partnership with ZET — owned the product spec and roadmap and drove cross-functional delivery across engineering, design, and the partner team from concept to launch.
- As Scrum Manager, restructured sprint planning and standups — lifted sprint completion rate from 40% to 75% and cut average standup time from 30 to 20 minutes.
- Owned Bachatt's Atlassian → self-hosted migration end-to-end — moved Jira & Confluence onto self-hosted Plane + Outline on Azure AKS (Helm, ingress-nginx, cert-manager); wrote an idempotent Python Jira→Plane REST importer. Live at plane.bachatt.app / wiki.bachatt.app.
- Built plane-slack-relay, a two-way Plane↔Slack bridge (Socket Mode) with DM-centric notifications, per-ticket work-timers, and daily sprint digests — cut status-chasing overhead for the eng team.
- Stood up production infra on Azure AKS (Helm charts, cluster bootstrap, secrets) and a CDN asset-compression pipeline (GIF→WebP) that shrank app payloads; also contributed to the public Next.js marketing site.

Brand Marketing Intern | CashKaro

Mar 2026 – Apr 2026

- Built a campus growth strategy deck for NSUT — mapped the funnel, worked out unit economics, and laid out a 30-60-90 day plan.
- Drove 40+ students to sign up and transact within 3 weeks (tracking install→first-transaction); found hostel students and frequent online shoppers convert best and retargeted them with tailored messaging.

Logistics Coordinator | Moksha & Resonanz – NSUT

Mar 2024 – Present

- Ran logistics for 50+ events across 6 venues at North India's largest college fest, managing 20+ volunteers; cut average setup time via staggered vendor slot allocation.
- Handled 15+ external vendors and 10 internal stakeholders and kept escalations to zero on both event days.

Executive Committee Member | PM Club, NSUT

Sep 2025 – Present

- Run case-study sessions for 50+ members (CashKaro's affiliate model, Instagram for blind users, corporate cab systems) and teach PM basics — RICE, North Star metrics, JTBD — to juniors new to product analysis.

PROJECTS

Findesk – AI Equity-Research Assistant | Next.js 14, TypeScript, Gemini API, Supabase

[Live](#)

- Personal build: search any NSE stock for live price, fundamentals & news plus an AI research brief (Buy/Sell rating, 12-month target, bull/bear/risks) via Gemini structured JSON, with a Supabase-backed watchlist.
- Every third-party source is cached (15–30 min TTL) with graceful fallbacks, and all LLM output is defensively validated so the app never crashes on malformed responses.

Product Analytics Dashboard | Python, Streamlit, pandas

[Live](#) · [GitHub](#)

- Turned a real 2.7M-event e-commerce clickstream into product metrics — conversion funnels, cohort retention, KPIs, and a churn model — each view surfacing a plain-English insight; funnel/cohort logic written as pure functions that generalize to any event stream.

Delhi-NCR Air Quality Analytics | Python, Streamlit, statsmodels (SARIMA)

[Live](#) · [GitHub](#)

- Analyzed real CPCB data (2015–2026, 3 validated sources) for trends, seasonality, and event impact (Diwali, stubble burning, COVID); built a SARIMA forecast beating naive baselines on a 30-day holdout (MAE 24.7 vs 29.6).

ACHIEVEMENTS & CERTIFICATIONS

- Solved 500+ DSA problems, Top 100K on LeetCode (Pupil on Codeforces).
- Published peer-reviewed ML research paper on Solar PV performance enhancement — *Physica Scripta* journal.
- Gold Medallist — NPTEL Programming in Java (IIT-certified). Certifications: SQL Bootcamp (Udemy), Product Management Fundamentals (Coursera), Power BI (Microsoft).

SKILLS

Product: Product launches & GTM, PRDs & roadmapping, cross-functional leadership, Agile/Scrum & sprint planning, experimentation (A/B testing), funnel & cohort analysis, RICE prioritization, North Star & AARRR metrics, user research, competitive benchmarking

Engineering: TypeScript/JavaScript, Python, C++, SQL/Postgres, MongoDB, Next.js, React, Node.js, REST APIs, HTML/CSS

Infra & Data: Docker, Kubernetes (Azure AKS), Helm, Jenkins CI/CD, Git, Supabase, Streamlit, pandas, LLM APIs (Gemini)

Tools: Power BI, Excel (VLOOKUP, pivot tables), Figma (wireframing), Jira/Plane, Slack API
