EDUCATION

Course	College / University	Year	CGPA / %
B. Tech (Electrical Engineering)	Netaji Subhas University of Technology	2027	7.73
CBSE (Class XII)	Navyug Senior Secondary School	2022	86%
CBSE (Class X)	DAV Public School	2020	95%

EXPERIENCE

Associate Product Manager Intern | Bachatt *May 2026 – July 2026*
Certificate

- Launched a new credit-card product line in partnership with ZET; owned the spec/PRD, defined the activation funnel and success metrics, and drove it from concept to live across engineering, design and the partner team.
- Owned delivery as Scrum Manager; lifted sprint completion from 40% to 75% and cut standup from 30 to 20 minutes, returning roughly two engineering days per sprint.
- Scaled BigQuery-based per-user credit-card journey tracking from one to four partners (ZET, IOB, Uni and Bajaj); automated daily MIS consolidation for ZET, Uni and Bajaj into a scheduled workbook to eliminate manual report assembly.
- Instrumented the credit-card landing site for conversion testing: four themes running as variants, GA4 and CleverTap events on Apply Now, a scroll-depth event at 50%, and the active theme attached as a global GA4 parameter so variants are actually comparable rather than merely live.

Brand Marketing Intern | CashKaro *Mar 2026 – Apr 2026*

- Instrumented the install-to-signup-to-first-transaction funnel and converted 40+ students in under 3 weeks; identified hostel residents and high-frequency online shoppers as the highest-converting cohorts and retargeted them.

PROJECTS

Findesk — AI Equity Research & Portfolio Platform | *Next.js 14, TypeScript, Python, Gemini API, Supabase* *Live*

- Shipped 0-to-1 to six live surfaces: stock research (price, fundamentals, news, AI Buy/Sell brief with a 12-month target), a mechanical NIFTY-500 value+momentum screen, a portfolio tracker with an AI health analyzer, a paper-trading desk, compare and watchlist, on Supabase auth with row-level security; verified behavior with 752 automated tests.
- Built a portfolio-aware chat assistant on Gemini function calling with 4 server-side tools so the model fetches only what a question needs; user identity comes from the session cookie and never the request body, so a crafted request cannot read another user's holdings.
- Designed a 60-question AI benchmark using fixed synthetic financial-data snapshots to evaluate tool selection, evidence handling and latency; retained quota and service failures in the results.
- Added deterministic evidence guards for unknown analyst coverage, headline-only news causation, stale quotes and unsupported feed provenance; withheld model preambles during tool calls and verified the changes with regression tests and desktop/mobile rendering checks.

Product Analytics Dashboard | *Python, SQL, pandas, Streamlit* *Live*

- Wrote a companion growth case study that diagnoses the drop-off and designs the fix: 2.45% of viewers add to cart and 28.04% of those buy (0.83% end to end), with the worst-converting pocket being new visitors holding single-item carts at 23.86% - which is also 65% of all cart activity, so it is both the weakest step and the largest one.
- Sized the experiment before proposing it: a 5% relative MDE needed roughly 17 weeks at observed traffic, so the test was re-specified at +10% over about 4.5 weeks with the resulting blind spot stated rather than hidden.

POSITIONS OF RESPONSIBILITY

Vice President | PM Club, NSUT *Sep 2025 – Present*

- Run weekly product case sessions for 50+ members (affiliate-model economics, accessibility, urban mobility) and teach RICE, North Star metrics and JTBD to juniors new to product analysis.

Logistics Coordinator | Moksha & Resonanz, NSUT *Mar 2024 – Present*

- Ran live operations for 50+ events across 6 venues, coordinating 20+ volunteers, 15+ external vendors and 10 internal stakeholders under continuous time pressure.

ACHIEVEMENTS & CERTIFICATIONS

- Published a peer-reviewed research paper on solar PV performance enhancement in Physica Scripta (IOP Publishing).
- Solved 600+ data-structures and algorithms problems on LeetCode; Pupil on Codeforces.
- Gold Medallist, NPTEL Programming in Java (IIT-certified).

SKILLS

Product: PRDs & roadmapping, 0-to-1 launches & GTM, RICE prioritization, A/B testing & experiment design, Agile/Scrum & sprint planning

Analytics & AI: SQL/Postgres, BigQuery, Python (pandas, NumPy, statsmodels), GA4 & CleverTap event instrumentation, LLM function/tool calling, fixed-snapshot AI evaluation & model benchmarking
