Full-Stack & DevOps Engineer | EE undergrad, NSUT

EDUCATION

Course	College / University	Year	CGPA / %
B. Tech (Electrical Engineering)	Netaji Subhas University of Technology	2027	7.7
CBSE (Class XII)	Navyug Senior Secondary School	2022	86%
CBSE (Class X)	DAV Public School	2020	95%

EXPERIENCE

Software Developer Intern | Bachatt (Fintech) May 2026 – July 2026

- Owned Bachatt's **Atlassian** → **self-hosted migration** end-to-end — deployed self-hosted **Plane + Outline on Azure AKS** (Helm charts, ingress-nginx, cert-manager, TLS); wrote an idempotent Python **Jira→Plane REST API** importer handling statuses, assignees, comments, and sub-tasks. Live at [plane.bachatt.app / wiki.bachatt.app](#).
- Built **plane-slack-relay** from scratch (Node.js) — a two-way Plane↔Slack bridge over Socket Mode with DM-threaded ticket notifications, a per-ticket in-progress timer, and scheduled sprint/reminder digests.
- Stood up Findesk's production infrastructure on **Azure AKS**: shared Helm chart (Deployment + Service + NGINX Ingress + HPA), cluster bootstrap script, in-cluster Redis, and Kubernetes Secrets management.
- Built a **CDN asset-compression pipeline** (GIF→WebP via Apollo) that cut app asset payload size; validated compression fidelity against the existing CDN pipeline.
- Wrote a Python/Postgres data pipeline scraping AMFI & SEBI investor-seminar sources into a shared schema for the Bachatt Elite masterclass product; contributed to the public [Next.js/TypeScript](#) marketing site.
- Led the launch of a new credit-card product line with partner **ZET** and served as **Scrum Manager**, lifting sprint completion 40%→75% and cutting standup time 30→20 min — product/process work behind the engineering.

Brand Marketing Intern | CashKaro Mar 2026 – Apr 2026

- Built a campus growth strategy deck for NSUT — mapped the funnel, worked out unit economics, and drove 40+ students to sign up and transact within 3 weeks.

Logistics Coordinator | Moksha & Resonanz – NSUT Mar 2024 – Present

- Ran logistics for 50+ events across 6 venues at North India's largest college fest, managing 20+ volunteers and 15+ external vendors with zero escalations.

PROJECTS

Findesk – AI Equity-Research Assistant | *Next.js 14, TypeScript, Gemini API, Supabase* Live

- Live NSE price/fundamentals/news plus an AI research brief (Buy/Sell rating, 12-month target) via Gemini structured JSON output, with a Supabase-backed watchlist (RLS, service-role access only).
- Every third-party data source is cached (15–30 min TTL) with graceful fallback; all LLM output is defensively parsed so malformed JSON never crashes the app.

FinSplit – UPI Expense Tracker | *React, Node.js, MongoDB, Razorpay API*

- Solo-built spec-to-MVP: group expense tracking with one-tap UPI deep-link settlement. Beta-tested with 30 users logging 500+ transactions; iterated the UI twice based on observed settlement rate and D7 retention vs. reported feedback.

Real-Time Chat Application | *MERN Stack, Socket.io, TailwindCSS*

- 1:1 chat with presence indicators, JWT auth, and persisted message history — benchmarked against 5 existing chat apps for latency and UX gaps; achieved <200ms message delivery.

Product Analytics Dashboard | *Python, Streamlit, pandas* Live · GitHub

- Turned a 2.7M-event e-commerce clickstream into funnels, cohort retention, KPIs, and a churn model; funnel/cohort logic written as pure, UI-free functions that generalize to any event stream.

Delhi-NCR Air Quality Analytics | *Python, Streamlit, statsmodels (SARIMA)* Live · GitHub

- Stitched 3 CPCB data sources (2015–2026) into one validated series; built a SARIMA(1,1,2)(0,1,1,7) forecast beating naive baselines on a 30-day holdout (MAE 24.7 vs 29.6).

SKILLS

Languages: TypeScript/JavaScript, Python, C++, SQL

Frameworks & Backend: Next.js, React, Node.js, REST APIs, Socket.io, MongoDB, Postgres/Supabase

Infra & DevOps: Docker, Kubernetes (Azure AKS), Helm, NGINX Ingress, cert-manager, Jenkins CI/CD, Git

Data & AI: pandas, Streamlit, statsmodels, LLM APIs (Gemini) & structured output, Power BI

Also: Product/roadmapping, Agile & Scrum, Figma (wireframing), Excel

ACHIEVEMENTS & CERTIFICATIONS

- Solved 500+ DSA problems, Top 100K on LeetCode (Pupil on Codeforces).
- Published peer-reviewed ML research paper on Solar PV performance enhancement — *Physica Scripta* journal.
- Gold Medallist — NPTEL Programming in Java (IIT-certified). Certifications: SQL Bootcamp (Udemy), Power BI (Microsoft).
